

Please support the SP 4 AAC The Connecticut Clean Air Act as it is essential to assist in cleaning up our environment and providing healthier air for our children and all residents of Connecticut. This bill will require Connecticut to electrify all school buses by 2035, require state and regional organizations to mitigate the carbon emissions impacts of new projects with carbon-reducing ones, and make it easier to install electric vehicle charge stations at home. Also the state will be unable to buy or lease any diesel fueled transit bus after January 1, 2024. An added bonus is that e-bikes will be added to the electric vehicle rebate program (CHEAPR)

These measures are all benefits to helping Connecticut achieve cleaner air and keep our state healthy. It is imperative that these measures be adopted particularly in view of the ongoing below standards air quality in our state.

I urge you to support this critical legislation to enable Connecticut to come up to standards for healthy clean air.

Thank you.

Sincerely,
Loretta Wrobel
